Automated Test Log

Student: ABIJURU CYNTHIA | Registration: 25/27096 | Verification: AI-A2-7096

Command: `pytest -q`

Result captured during preparation: **9 passed**.

Covered checks: reproducible dataset generation, duplicate/missing-value cleaning, valid inference, missing field rejection, wrong numeric type rejection, range validation, health endpoint, valid prediction API response, and invalid-range API response.

Re-run this command on the submission computer and replace this log with a fresh, truthful capture if the result differs.
